

**PRESIDENT UNABLE
TO VOTE THIS YEAR**

For the First Time Since Being in Office Wilson Does Not Leave Washington to Cast Ballot.

CABINET MEMBERS DEPART

Regular Meeting Is Called Off When Members Go Home to Vote—Palmer and Glass Leave.

WASHINGTON, Nov. 4.—With several members of President Wilson's cabinet in their home-towns today to cast their ballots, the administration has called off its two-day meeting. It was expected to assemble later in the week, however, to discuss the coal strike and the appointment of a commission on industrial unrest.

Cabinet officers absent included Attorney General Palmer, who was at his home in Scranton, Pa., and Secretary Glass, who was in Lynchburg, Va. Secretary Baker had obtained an absences ballot from Cleveland and voted by mail.

For the first time since he has been in the white house, President Wilson was unable to go in his home in Princeton, N. J., to cast his ballot. Secretary Tumulty said the president had no desire to shape his morning and would be permitted to receive the election returns "provided they are good."

The house of representatives was not in session, having recessed so members from states where elections were being held could return home. The senate, however, continued its discussion of the peace treaty.

**STOP INJUNCTION,
MINERS' DEMAND
FOR NEGOTIATION**

CONTINUED FROM PAGE ONE.

Constrained by miners officials, any statement as to continuation of the strike would be a violation of the restraining order issued in federal court here against them last week.

In view of this Mr. Lewis' statement is taken to mean that no move toward settling the dispute will be taken before the opening negotiations.

Previously, breaking his silence here for the first time since he was served with the restraining order from the court of Federal Judge A. H. Anderson last Friday, Mr. Lewis gave out the following statement in regard to government efforts to end the strike of approximately 425,000 soft coal miners.

"The machinery of the joint system of bargaining in the mining industry is intact. It would be a simple matter for the government and the coal operators again to set it in motion to negotiate a wage agreement."

**THINK LONG
STRUGGLE AHEAD.**

WASHINGTON, Nov. 4.—Despite the spirit of hopefulness in official quarters that the end of the coal strike was near, spokesmen here for miners and operators declared to-night the country was in for a protracted industrial struggle in the bituminous fields.

Labor leaders estimated that all union mines would remain closed at least four weeks. Other estimates put that time in half, but officials, although without word or direct effort to bring the two sides together, held firmly to the view that the strike would not run so long.

There were no confidential reports from departmental justicemen in the fields and reports to Washington headquarters of the operators announced that overnight conditions were unchanged.

Price Maximum Price.

Fuel Administrator Garfield today took active control of the situation and made ready to fix a maximum price on coal at the first evidence of attempt to advance the selling price.

Dr. Garfield took part in several conferences, but it was stated officially that he had not discussed settlement of the strike with operators. J. D. A. Morrow, vice-president and executive secretary of the National Coal Association, and a former member of the fuel administration, was among those who saw Dr. Garfield. The meeting was widespread reports that Dr. Garfield had been delegated to act as mediator. Several other members of the fuel administration staff, including Mr. Morrow, saw Dr. Garfield.

Think Miners Will Return.

Attorney General Palmer in a letter today to a shipbuilder's council, which protested against injunction proceedings, sounded a new note of hope. Calling his belief that if the federal court at Indianapolis Saturday held the strike illegal, the miners "as law abiding citizens, will discontinue it." This letter was made public after the attorney general's office had denied a report that the injunction would be withdrawn.

In reply to the Delaware shipbuilders council, Philadelphia, Mr. Palmer said the fuel control law was still in force. Touching on the method of dealing with the strike, he said:

"There were only two ways open to me to enforce the law, one by criminal and the other by civil action. I might have instituted criminal prosecutions against hundreds of American citizens, but I preferred to believe that in ordering this strike they were not conscious of the fact that they were violating the criminal laws of our country and that it would be better to have the question adjudicated by the courts in a civil proceeding. I assume that the miners are law-abiding citizens, and that they do not intend nor desire to disobey the laws of the United States. You will, of course, agree with me that the laws of the land must be obeyed and that there is no organization, great or small, in the United States which is superior to the laws of the land."

"The issue will be submitted to the court at Indianapolis next Sunday calmly and dispassionately, and if the court adjudges that the strike is illegal, I apprehend that the miners as law-abiding citizens, will discontinue it."

Ask Congress to Act.

Special investigating commission to attempt arbitration of the bituminous coal strike was presented to the resolution introduced today by Chairman Kenyon of the labor committee. Without discussion the measure was referred to the committee.

The resolution provides that the commission be composed of three members who shall call together

"FIDDLE-FIT"

Keep Liver and Bowels Clean and Active with "Cascarets"

"Fiddle-fit" is a simple oil engine used to drive a pump. It is built up of a flywheel, a motor, a pump, and a base. The flywheel is turned by hand, and the pump is driven by the motor. The oil is pumped from the base into the flywheel, and the flywheel turns the motor, which drives the pump. The pump is connected to a hose, which is attached to a container. The container is filled with water, and the pump is turned on. The water is then pumped out through a hose, which is attached to a faucet. The faucet is turned on, and the water flows out. The entire unit is mounted on a base, which is secured to the ground.

SICK HEADACHE, BLOOMNESS, COATED TONGUE, SOUR, Gassy STOMACH, H-ALWAYS trace this to torpid liver; delayed, fermenting food in the bowels.

Poisonous matter clogged in the intestines, instead of being cast out of the system, is re-absorbed into the body. When this happens, the delicate brain tissue it causes congestion and that dull, throbbing sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

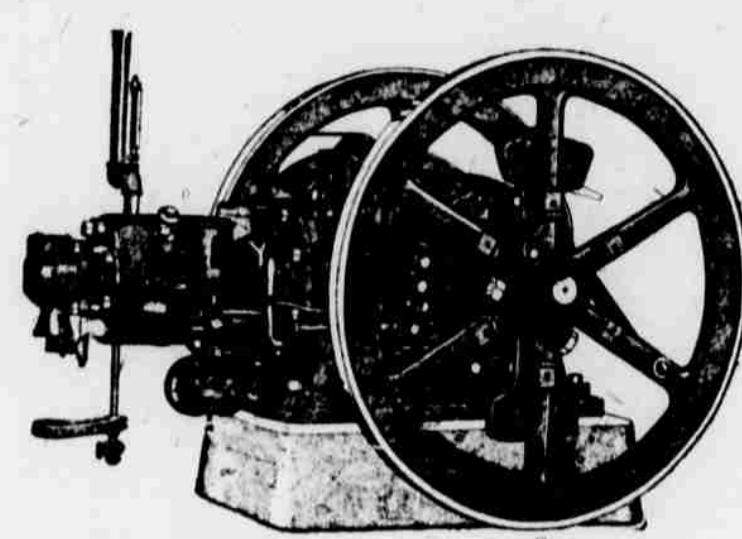

A Cascaret tonight will have you feeling clear, rosy and as fit as a fiddle by morning. They work while you sleep.—Advt.

FRENCH CHURCHES GET GIFT

Reverend MacFarland of Federated Body Sells With \$71,000

NEW YORK, Nov. 4.—Reverend

Charles S. MacFarland, general secretary of the federal council of the French Protestant churches. Dr. MacFarland will present the gift at a convention of the French Protestant federation at Lyons.

This Is the Engine That Drives Hundreds of Oil Well Pumps

Before you buy any engine—ask these questions. "Who else uses them?" "How long have they been in service?" and "How are they performing?"

Fairbanks-Morse "Y" Oil Engines are used at hundreds of oil wells. During the past several years, they have built up and are maintaining exceptional records for endurance and economical operation—with little attention and low upkeep cost.

Simple in construction—practically automatic in operation and regulation—no carburetors, valves, batteries, mixers, timers, igniters, magnetos, switches or spark plugs.

Special quick-starting device; air seal prevents oil from being blown out of bearings; positive lubrication; sensitive governor. No hot bulb—no water injection. Guaranteed by Fairbanks Morse Quality.

CAMEL CIGARETTES

CAMELS supply cigarette contentment beyond anything you ever experienced! You never tasted such full-bodied mellow-mildness; such refreshing, appetizing flavor and coolness. The more Camels you smoke the greater becomes your delight—Camels are such a cigarette revelation!

Everything about Camels you find so fascinating is due to their quality—to the expert blend of choice Turkish and choice Domestic tobaccos. You'll say Camels are in a class by themselves—they seem made to meet your own personal taste in so many ways!

Freedom from any unpleasant cigarette after-taste or unpleasant cigarette odor makes Camels particularly desirable to the most fastidious smokers. And, you smoke Camels as liberally as meets your own wishes, for they never tire your taste! You are always keen for the cigarette satisfaction that makes Camels so attractive. Smokers realize that the value is in the cigarettes and do not expect premiums or coupons!

Compare Camels with any cigarette in the world at any price!

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes or ten packages (200 cigarettes) in a glassine paper-covered box. We strongly recommend this carton for the home or office supply or when you travel.

Winston-Salem, N. C.

**COMB SAGE TEA
INTO GRAY HAIR**

Darkens Beautifully and Restores Its Natural Color and Lustre at Once.

Common garden sage brewed into a heavy tea, with sulphur and alcohol added, will turn gray streaked and faded hair beautifully dark and shiny. Mix Sage tea and Sulphur recipe to a strong, though not troublesome. An easier way to get the ready-to-use preparation improved by the addition of other ingredients, a large bottle at little cost, at drug stores, known as "Wyneth's Sage and Sulphur Compound," thus avoiding a lot of muss. While your faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness by darkening your hair with Wyneth's Sage and Sulphur Compound, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time, now, morning or night, your hair disappears. After a few applications or two your hair becomes beautifully dark, glossy, soft and luxuriant and you appear years younger.—Advt.
